Professional Scrum Master (PSM-I) Training

Overview

PSM-I training will push you to learn more about Agile and Scrum practises, so that you can provide effective support to your team and organisation.

 Scrum.org's approach to education emphasises collaborative teamwork through a blend of traditional lecture and hands-on exercises. Professional Scrum Trainers teach the course content in their own distinctive teaching styles, drawing on their own personal experiences as Scrum Masters and the training techniques they've honed over the years.
 The Averest team will arrange you a suitable training environment, complete with optional accommodation and transportation, so that you can focus on learning.
 A thorough comprehension of Scrum philosophy and concepts, the Scrum Master's responsibilities, and the significance of each component of the Scrum framework is achieved through a fun and interactive learning environment.

 After completing this training, you will have a better understanding of Professional Scrum, the agile mindset, and the ways in which to overcome common myths and obstacles to agility. You will learn how to identify and implement the strategies that will yield the greatest results for your Scrum Teams.

What You Will Learn?

- The empirical basis for Scrum's rules, making them easy to understand.

- Perform Scrum Master duties based on an understanding of servant leadership for Scrum Teams as well as other stakeholders.

- Start using Scrum efficiently.

- Practical guidance for putting the Scrum framework into practise.

Course Key Features

- Exam voucher

- 100% assurance to pass the exam

- Practice exam

- 1 on 1 assistance from our instructors as needed after training

- Interactive training with real-world simulations & case studies

Eligibility

The Professional Scrum Master course is designed for anybody who uses the Scrum framework to produce products. It is especially useful for people in an organization who are responsible for getting the most out of Scrum, such as Scrum Masters, managers, and Scrum Team members.

Professional Scrum Master (PSM-I) Training

Program Outline

Module 1: Scrum Basics

- What is Scrum and how has it evolved?

Module 2: Scrum Theory

- Why does Scrum work and what are its core principles?
- How are the Scrum principles different from those of more traditional software development approaches, and what is the impact?

Module 3: Scrum Framework and Meetings

- How Scrum theory is implemented using time-boxes, roles, rules, and artifacts.
- How can these be used most effectively and how can they fall apart?

Module 4: Scrum and Change

- Scrum is different: what does this mean to my project and my organization?
- How do I best adopt Scrum given the change that is expected?

Module 5: Scrum and Total Cost of Ownership

- A system isn't just developed, it is also sustained, maintained and enhanced.
- How is the Total Cost of Ownership (TCO) of our systems or products measured and optimized?

Module 6: Scrum Teams

- Scrum Teams are self-organizing and cross-functional; this is different from traditional development groups.
- How do we start with Scrum teams and how do we ensure their success?

Module 7: Scrum Planning

- Plan a project and estimate its cost and completion

Module 8: Predictability, Risk Management, and Reporting

date.

- Scrum is empirical. How can predictions be made, risk be controlled, and progress be tracked using Scrum.

- Discussion starts with "Done and Undone" and continues with Quality Assurance in Scrum.

Module 9: Scaling Scrum

- Scrum works great with one team. It also works better than anything else for projects or product releases that involve hundreds or thousands of globally dispersed team members.

- How is scaling best accomplished using Scrum?
