Digital Transformation Officer Training

Overview

Those who complete the course will be able to define key terms related to the Internet of Things, blockchain, artificial intelligence, cloud computing, big data, machine learning, and the Internet of Things. You will be able to adopt the methods and processes used by businesses undergoing digital transformation and assist a business in developing a digital transformation plan, carrying it out, monitoring its progress, and making necessary changes. With proper monitoring and analysis, the success of the digital transformation plan can be tracked and evaluated. That is why, you will learn to describe and implement the methods used in promoting a digital mindset and spreading the word about your organisation's digital transformation strategy.

What You Will Learn?

-

Course Key Features

-
